Dare I Call It Art?

magnusviri - James Reynolds, October 28, 2026

About magnusviri - James Reynolds

- U of U BMus 1999
- U of U Marriott Library, 14 years (Mac admin)
- U of U School of Biological Sciences/COS/LAS, 12 years (Mac, Linux, network admin)
- Security has been a “hobby” of mine for decades
- Since September 2022 (Stable Diffusion 1.0) I’ve been “obsessed with AI”
- https://magnusviri.com/saintcon2026

Agenda

- Invoke.ai
- What Is Art?
- Glossary
- Model Families
- Demo

Invoke.ai

Invoke.ai

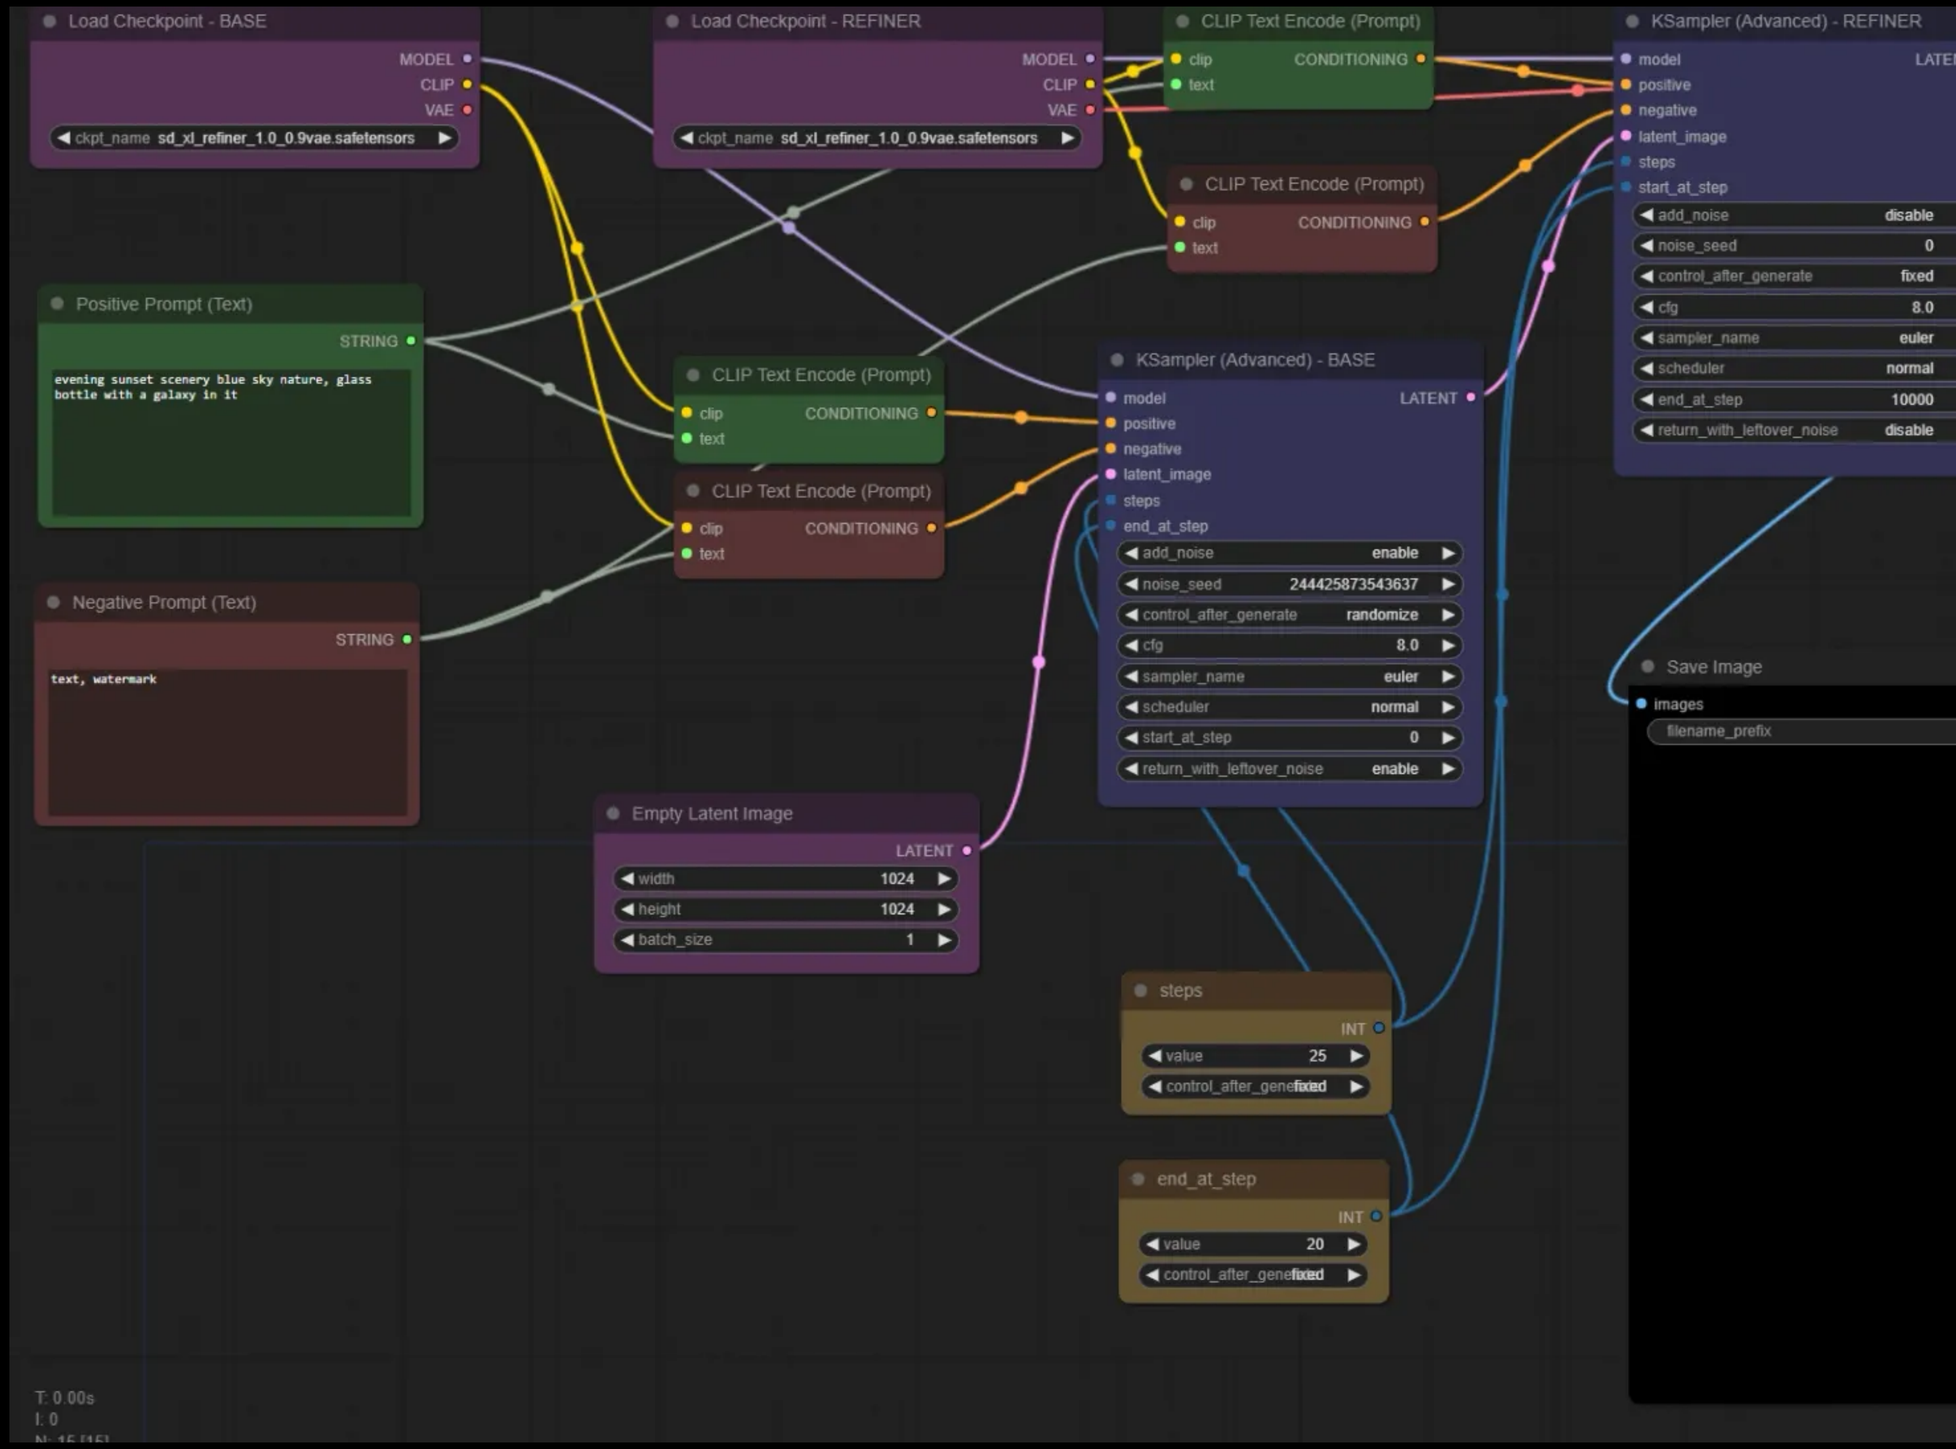

- Invoke started as a fork of the original Stable Diffusion 1.0 (Sept. 2022)
  - https://github.com/CompVis/stable-diffusion
  - One of the first with macOS support
- Invoke was less flexible than Automatic1111, but it always worked and only included legal components
- Invoke became a for profit company but then Adobe bought them last year
- Now they are a community group that is super active

Why use Invoke instead of ComfyUI

- ComfyUI is a workflow app, the drawing tools are basic
- Invoke is meant for artists with drawing tablets
- Invoke also has workflows (they aren’t compatible with ComfyUI)

ComfyUI

Load Checkpoint - BASE

Installing

- Requires an M-series Mac or a GPU with 4+ GB or VRAM
- https://invoke.ai/start-here/installation/
- It takes a while to download and install everything
- Completely free and local (you can also use cloud models but they cost)
- Note, I’m demoing version 7.0.0-alpha.3
- Come to the AI village and try it on one of our computers

What Is Art?

This is art.

Will AI ever be able
to make this?

No

Young Astronomer
by Brian Kershisnik
https://kershisnikprints.com/products/young-astronomer-poster

Is this art?

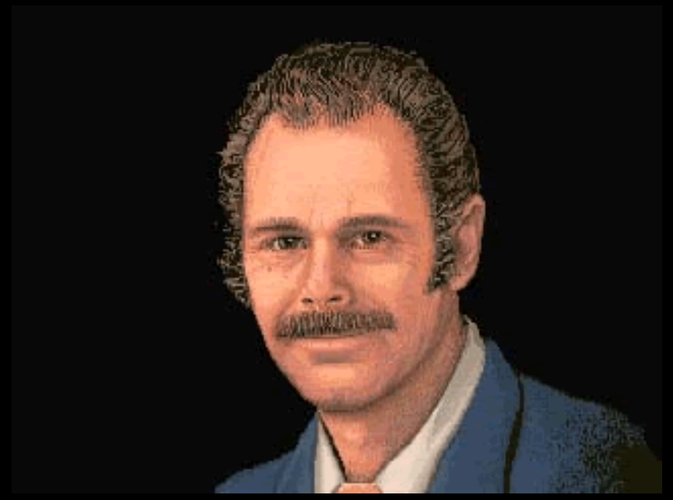

Yes

Is it art because of
how it was made?

Would it be art if
AI made it today?

Pixel art
(made on Amiga)
by James D. Sachs

How about this?

Can AI make it?

ANSI Art, 1992
https://16colo.rs/pack/icepk-08/TMT-SANC.ICE

How about this?

Debbie Harry
(made on Amiga in 1985)
by Andy Warhol

“Andy, in his way, was very sociable and hung around with any-and everybody.”

Debbie Harry, https://news.artnet.com/art-world/debbie-harry-andy-warhol-1696761

Art is positive human connections

US Copyright Office Agrees

- Only humans can obtain copyright
- “Authoring” means having sufficient control over expressive elements
- Prompts do not constitute sufficient control

https://www.copyright.gov/ai/Copyright-and-Artificial-Intelligence-Part-2-Copyrightability-Report.pdf?pubDate=20250918

A Single Piece of American Cheese

- Kent Keirsey (ex-CEO of Invoke.ai) copyrighted this AI image in February 2025
- He did a lot more than just prompt
- USCO considers it like a collage

https://44037860.fs1.hubspotusercontent-na1.net/hubfs/44037860/Invoke-First-Copyright-Image-AI-Generated-Material-Report.pdf

The Social Contract

- The term “handmade” exists for a reason
- Please don’t distribute AI images and pass them off as handmade
- It’s lying
- It’s stealing
- Just don’t
- There is a lot of anti-AI image sentiment and this is why

Photoshop

- At first, Photoshop was an artistic sin
- AI *can be* a tool just like Photoshop
- My goal will be to show how to use AI image gen as a tool

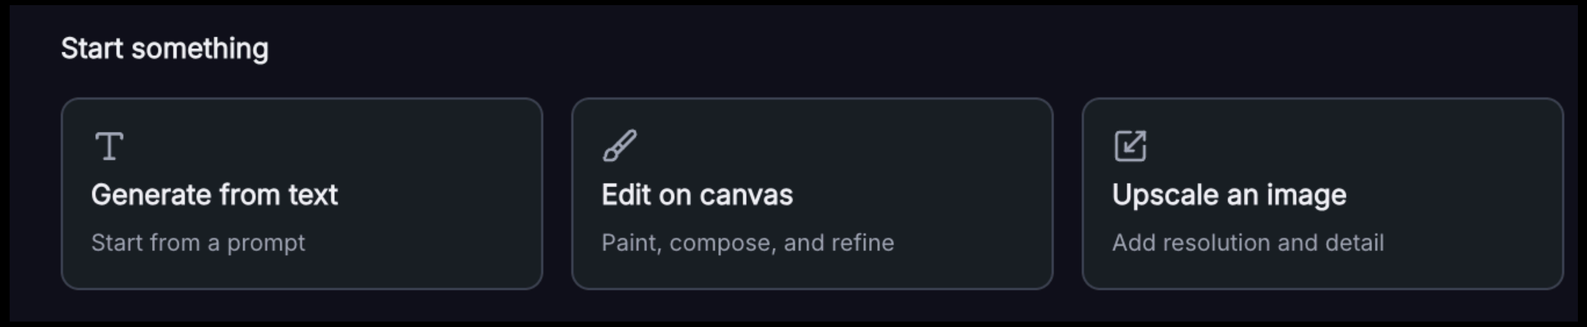

Glossary

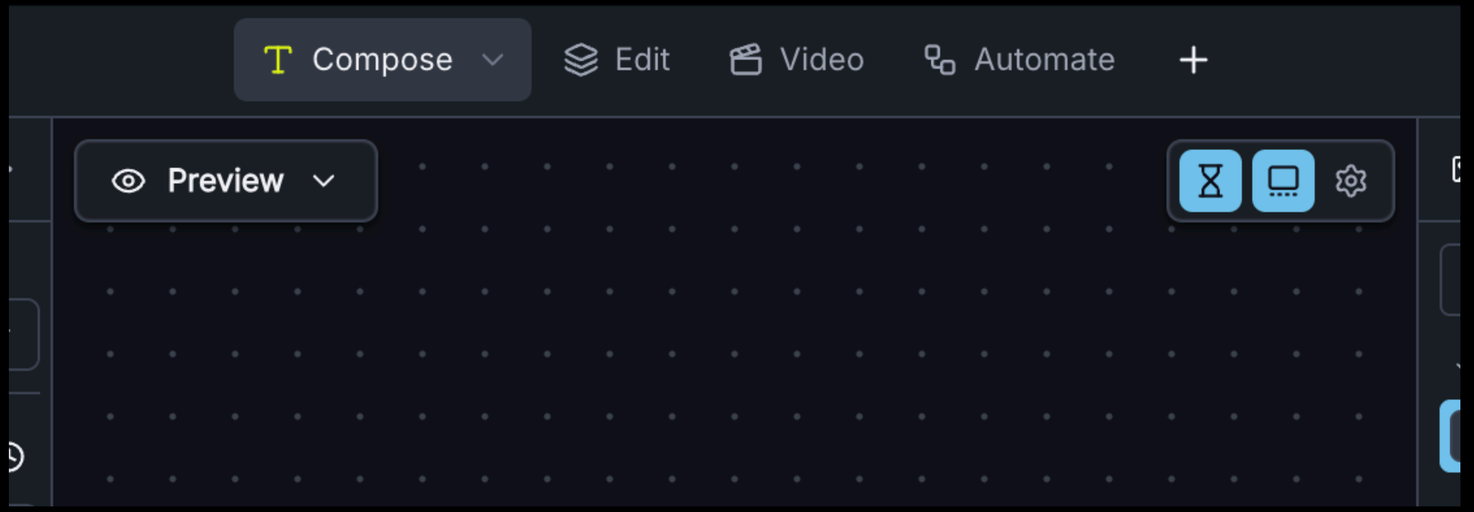

Glossary

- Text to Image
- Image to Image

  aka

  Inpainting/
  outpainting (Infill)

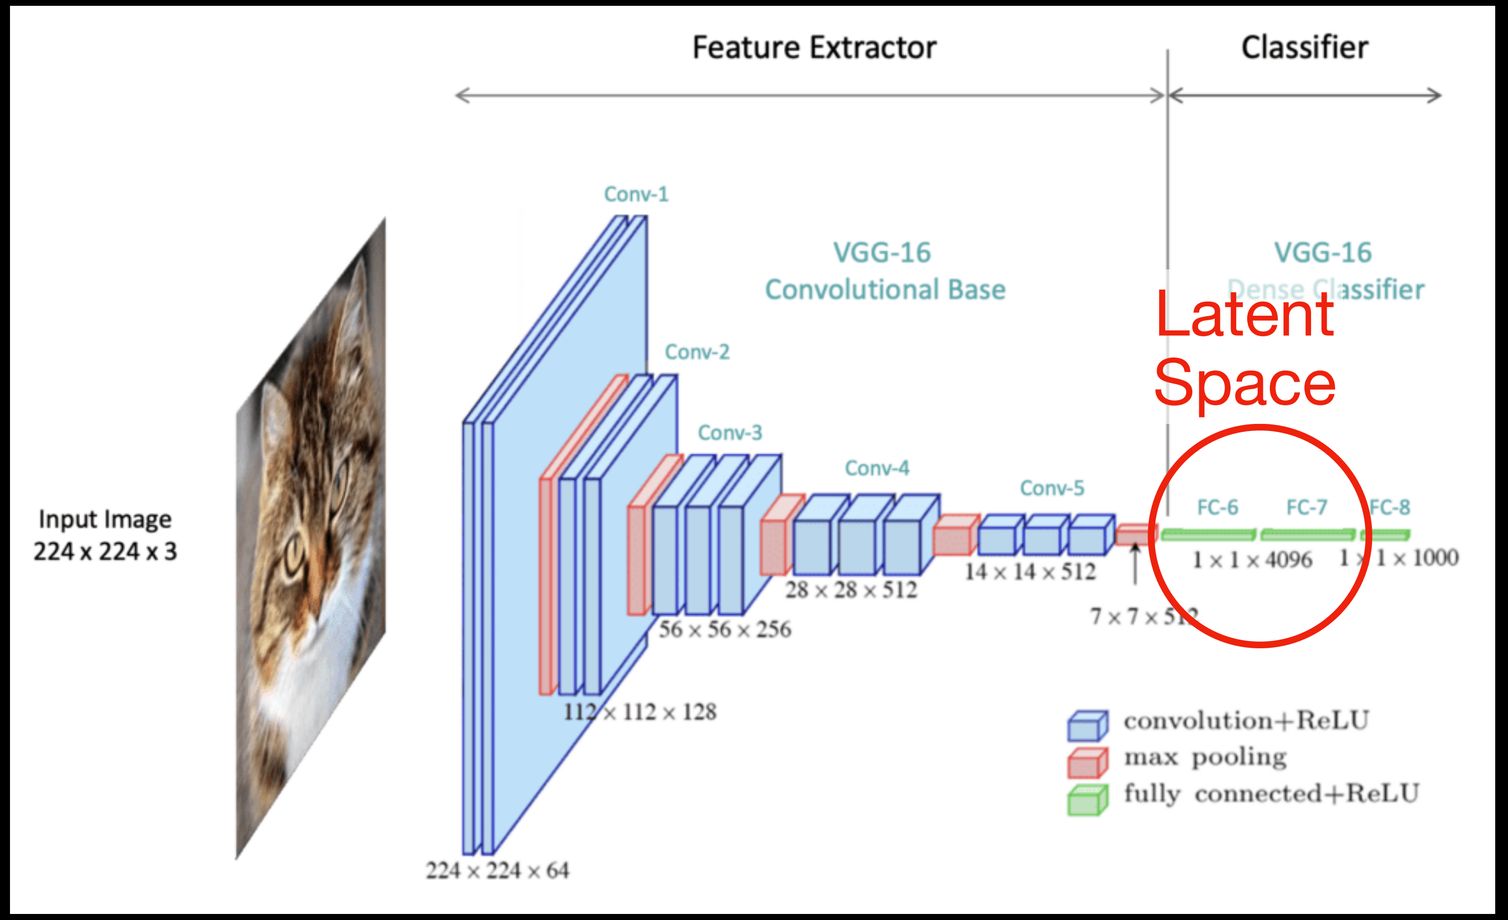

Glossary

- Model aka Checkpoint, the main trained model, aka base model
- Prompt
- Negative Prompt

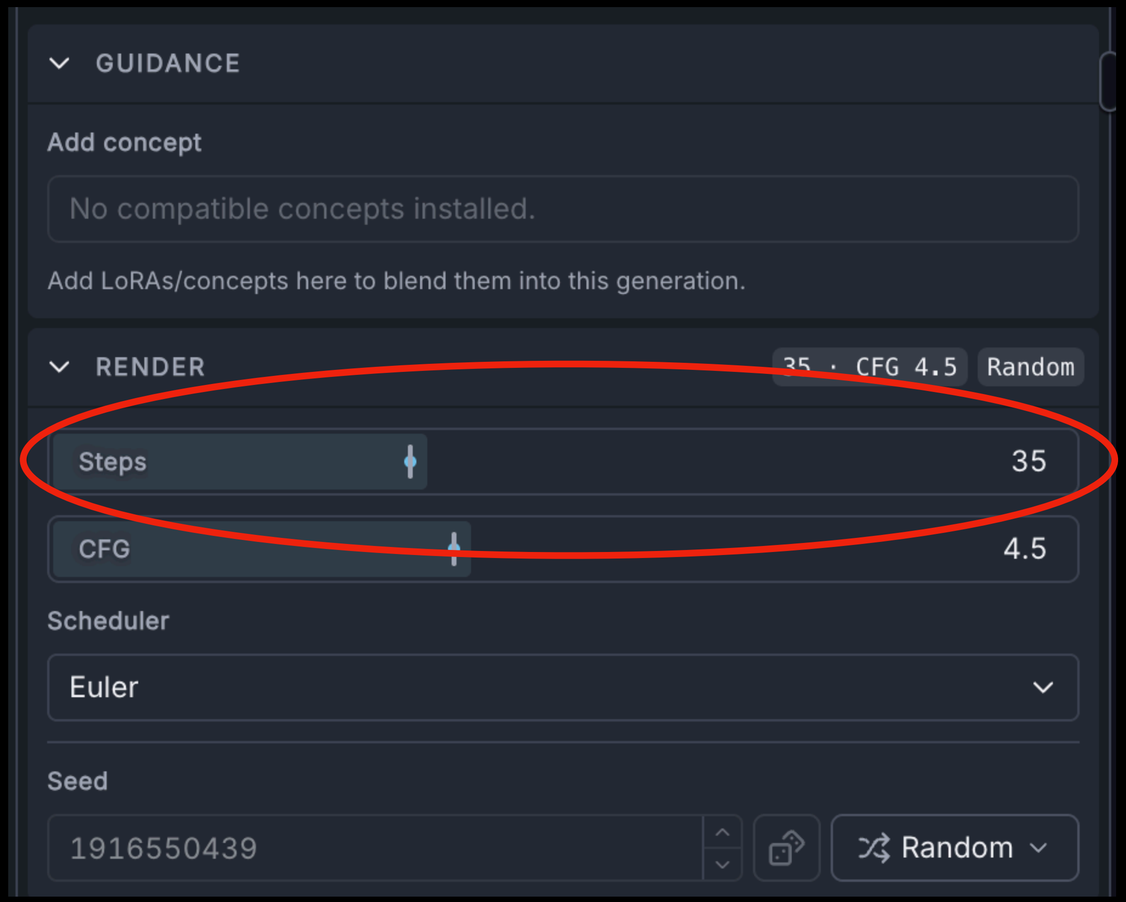

Glossary

- Latent Space
  - Where the ideas exist
  - Low resolution

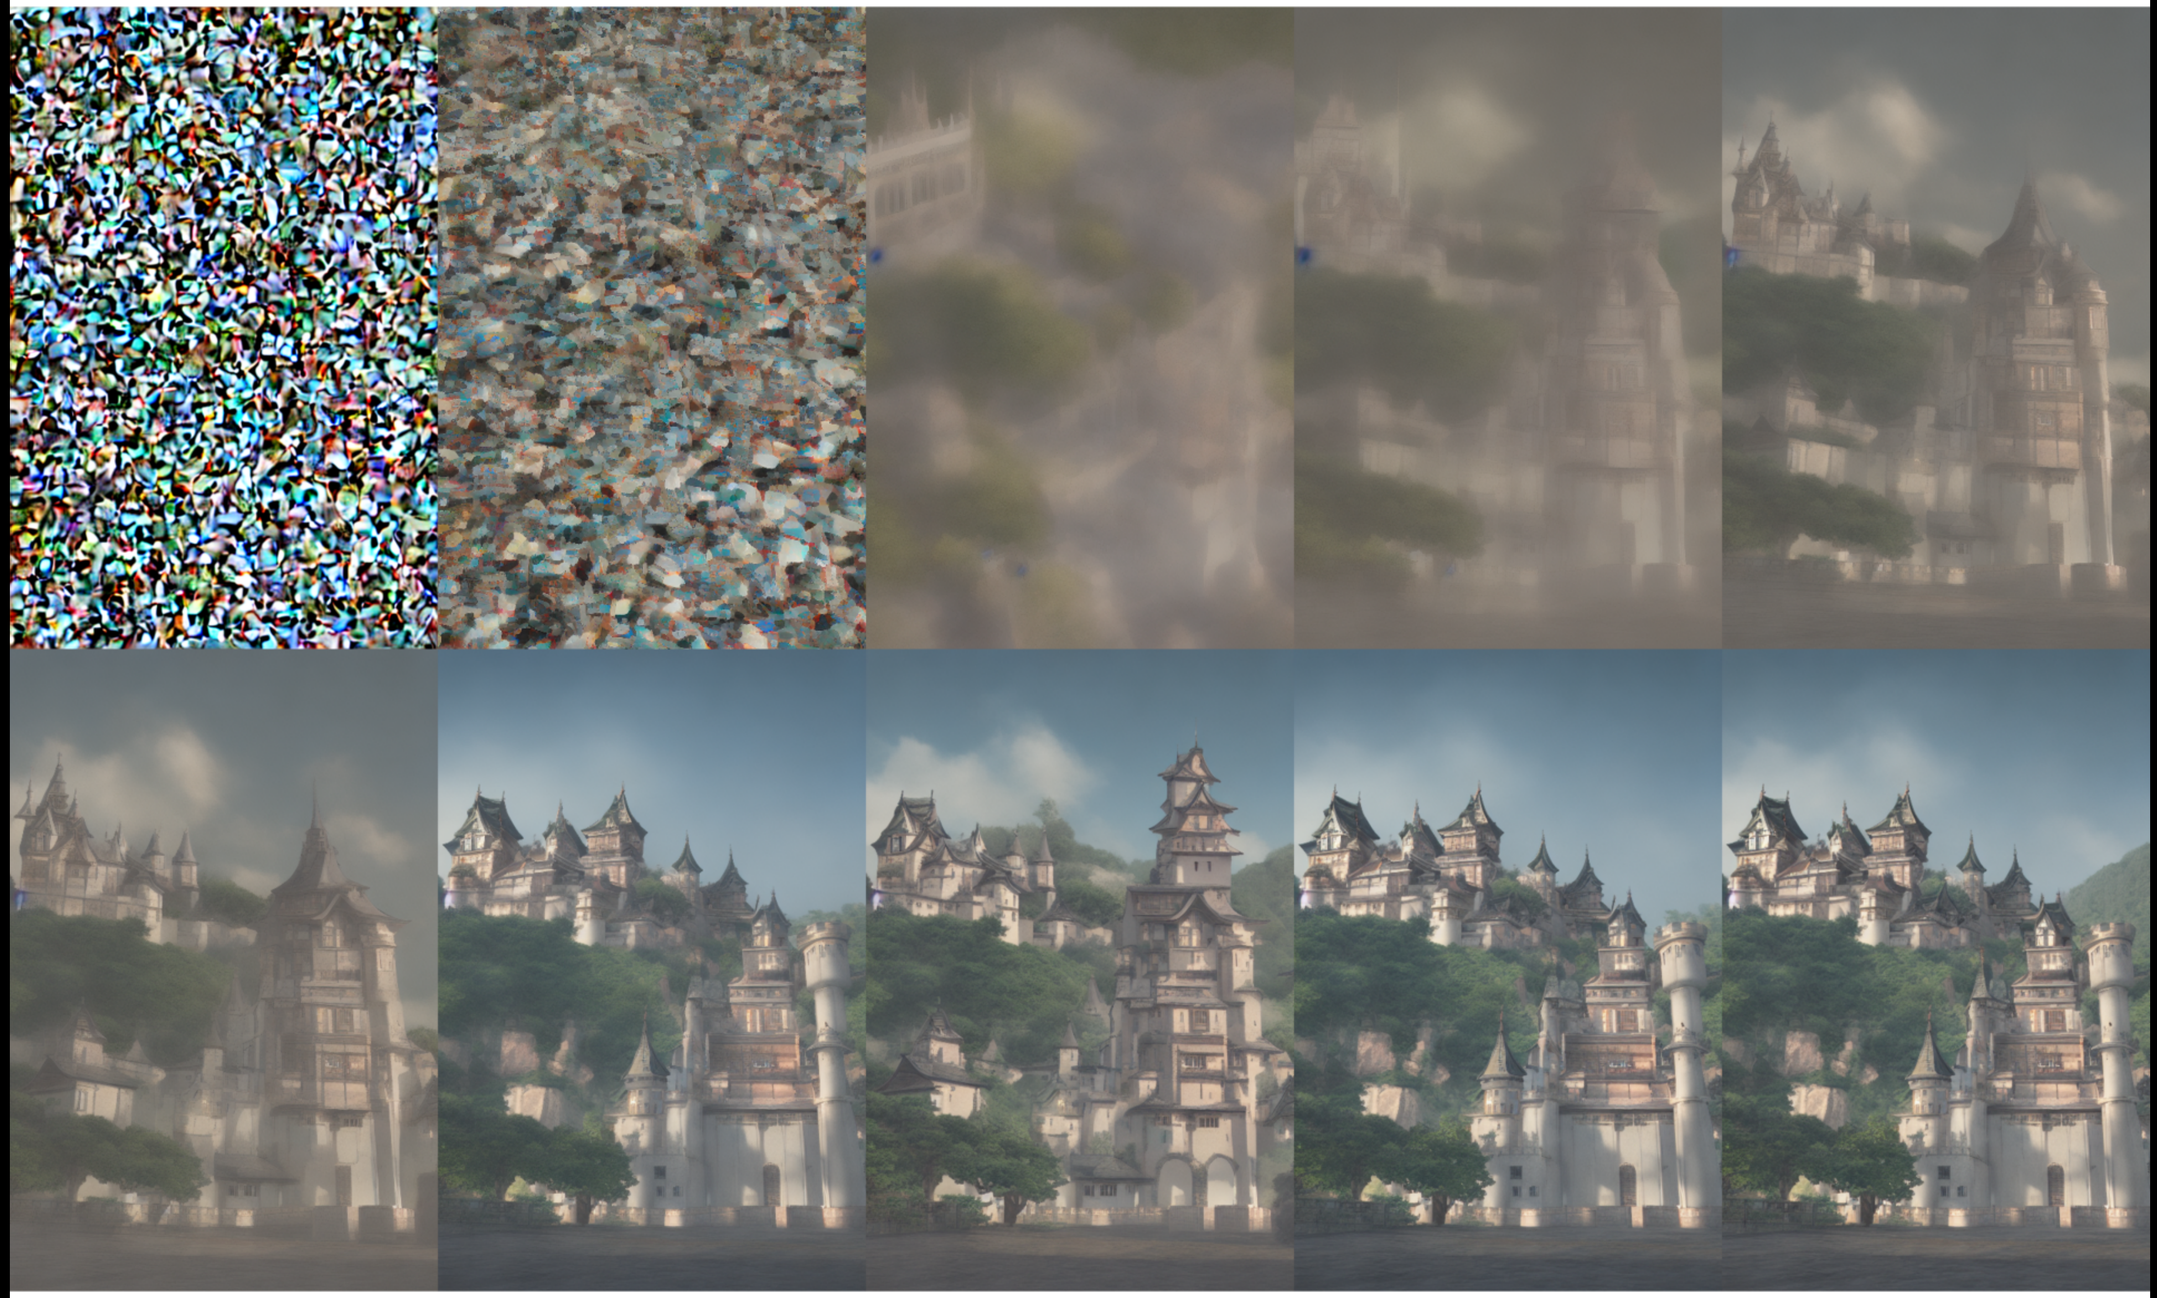

Glossary

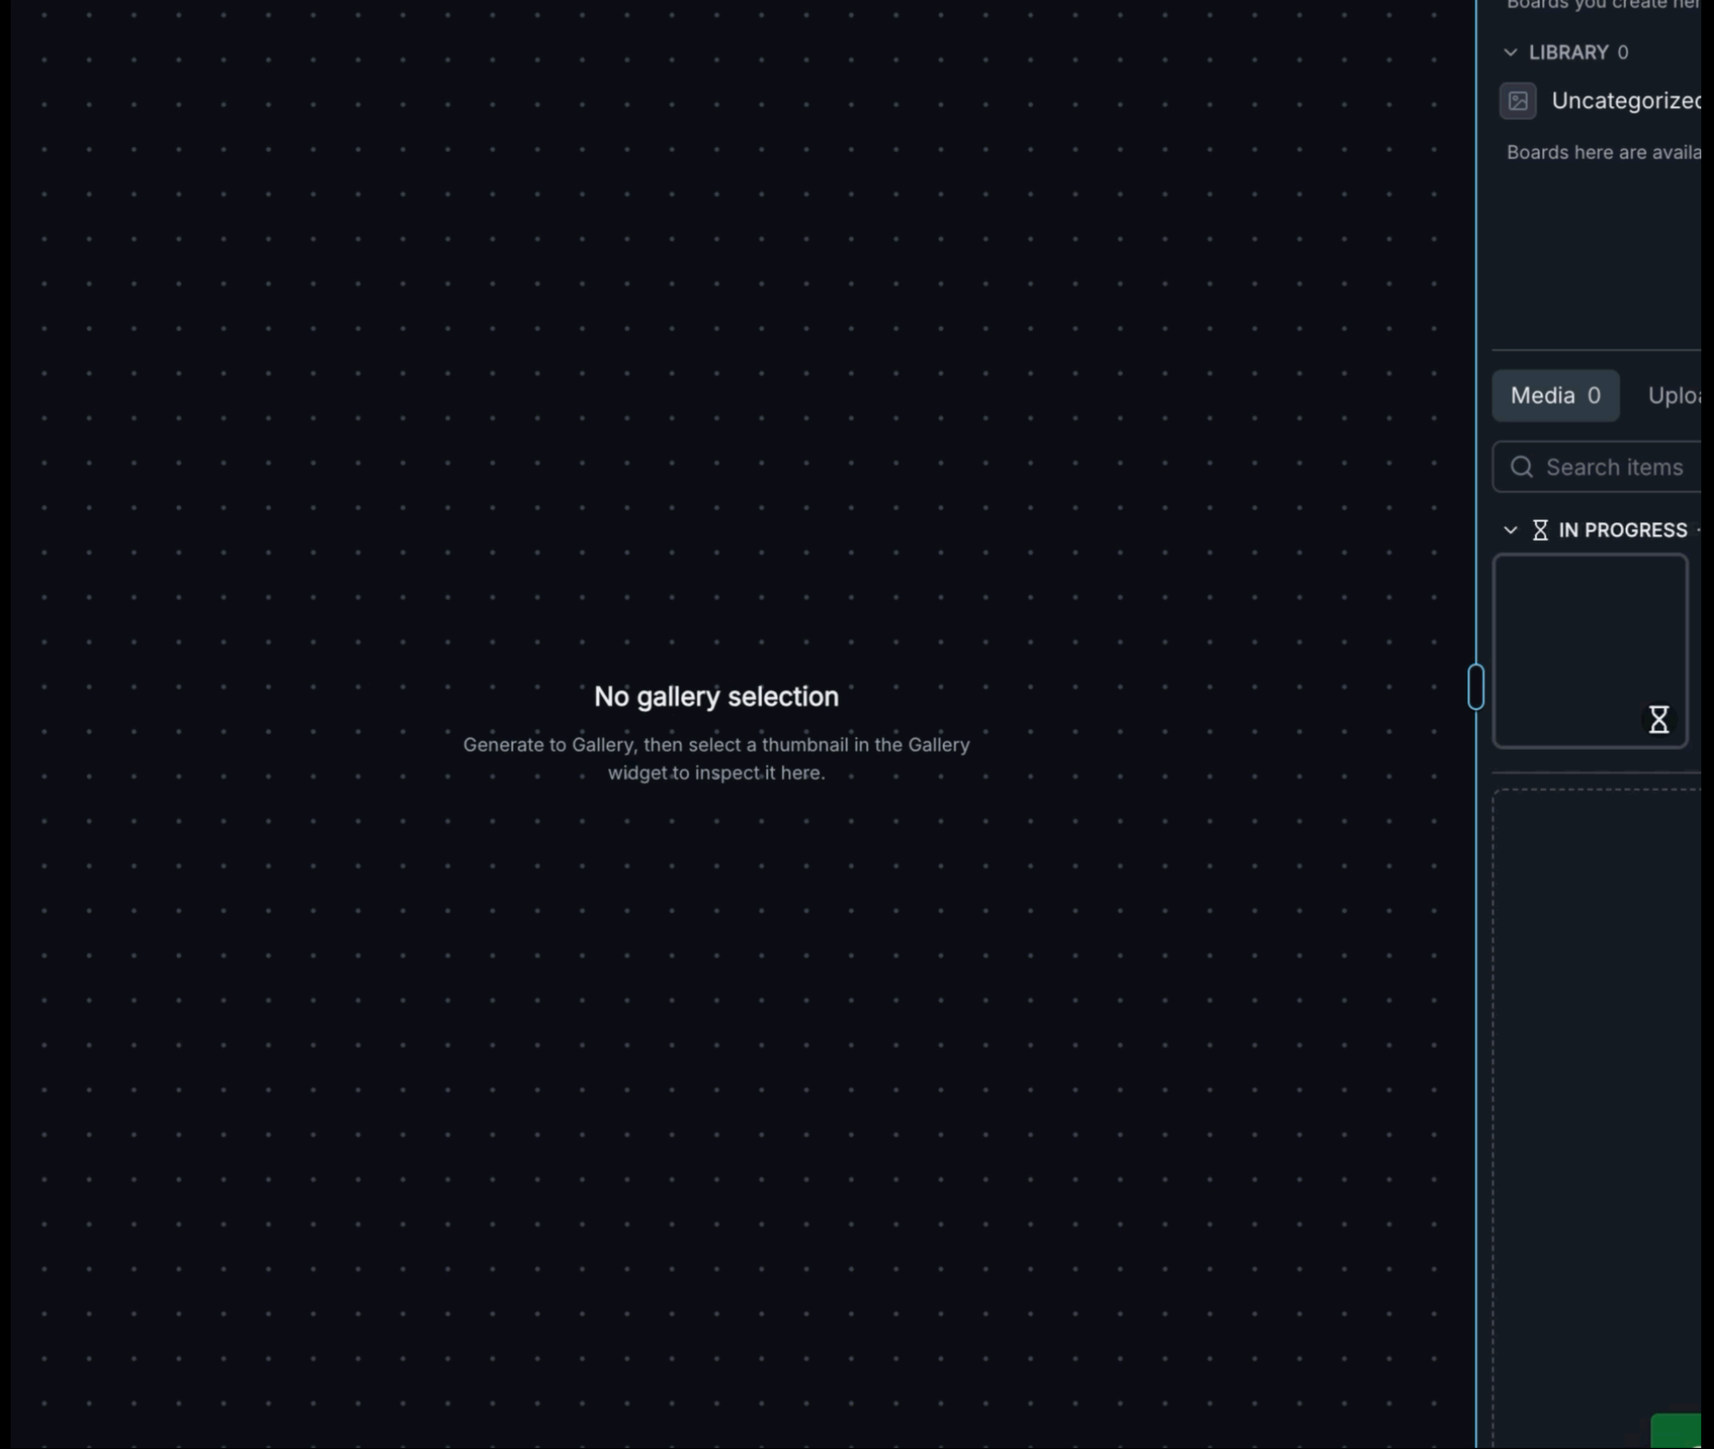

- Steps - The number of denoising steps

Steps: 1 | Steps: 2 | Steps: 3 | Steps: 5 | Steps: 8

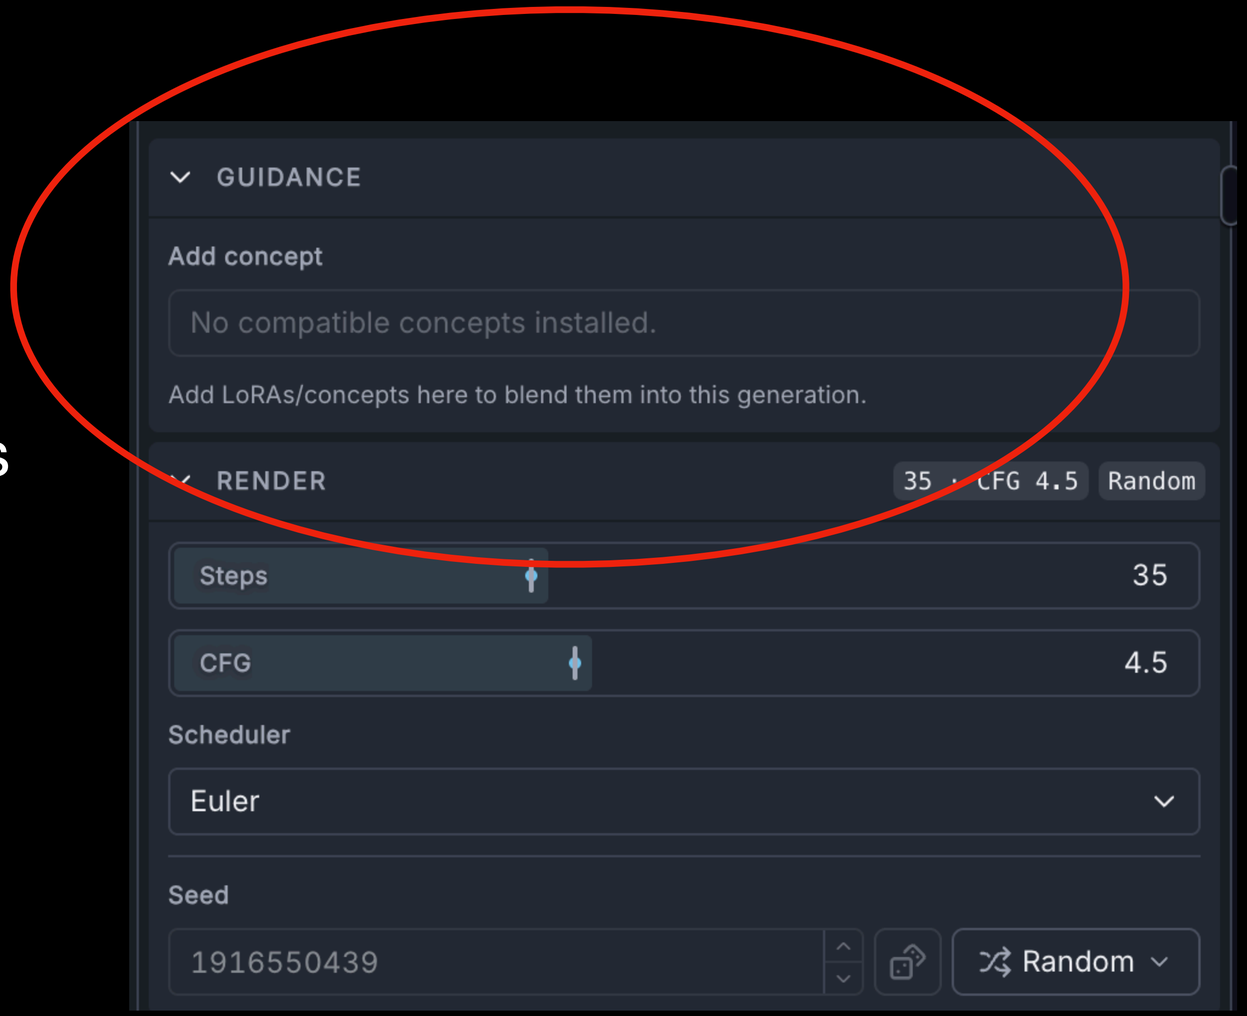

Steps: 10 | Steps: 15 | Steps: 20 | Steps: 30 | Steps: 40

Glossary

- LoRA - A small model modifier
  - Only works with 1 base model
- Turbo model/LoRA - uses fewer steps

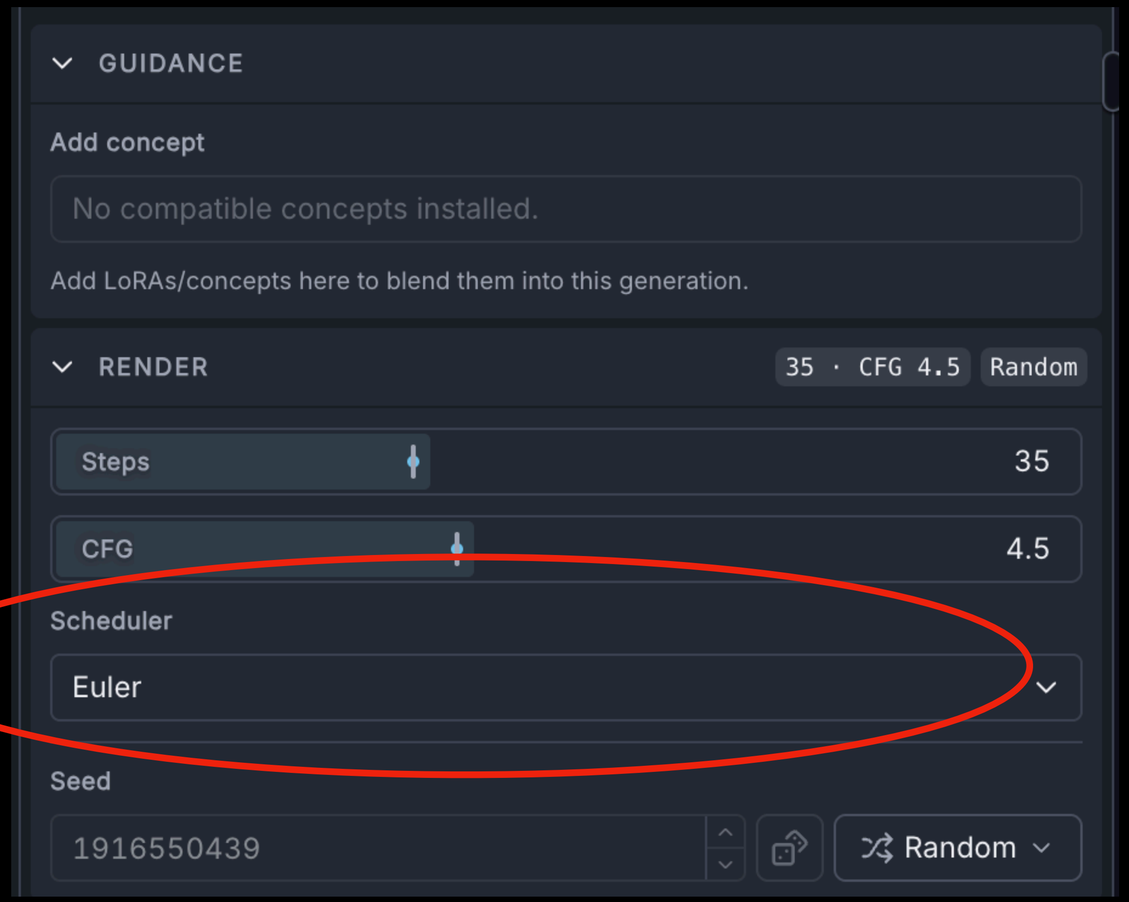

Glossary

- LoRA - A small model modifier
  - Only works with 1 base model
- Turbo model/LoRA - uses fewer steps
- CFG - How closely to follow the prompt

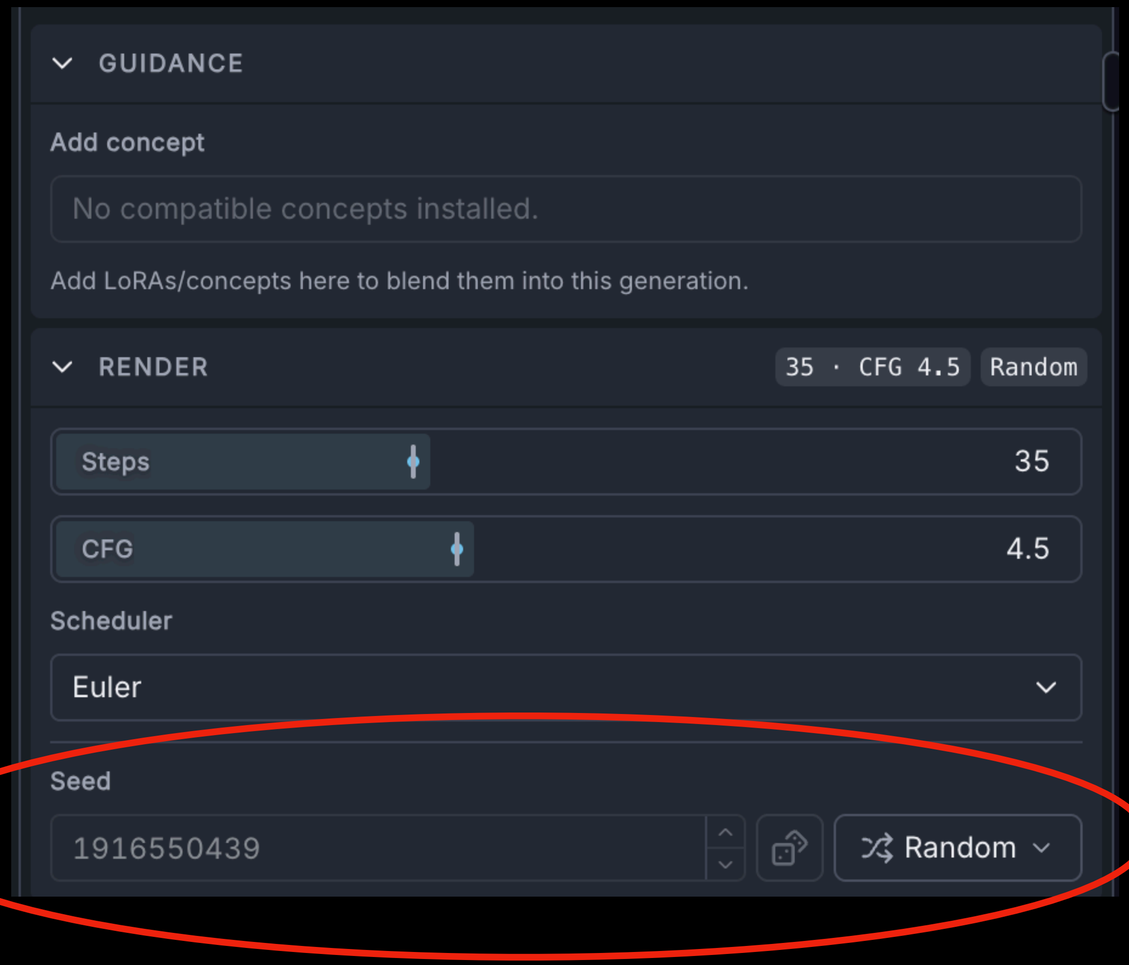

Glossary

- LoRA - A small model modifier
  - Only works with 1 base model
- Turbo model/LoRA - uses fewer steps
- CFG - How closely to follow the prompt
- Scheduler - how the model generates each step

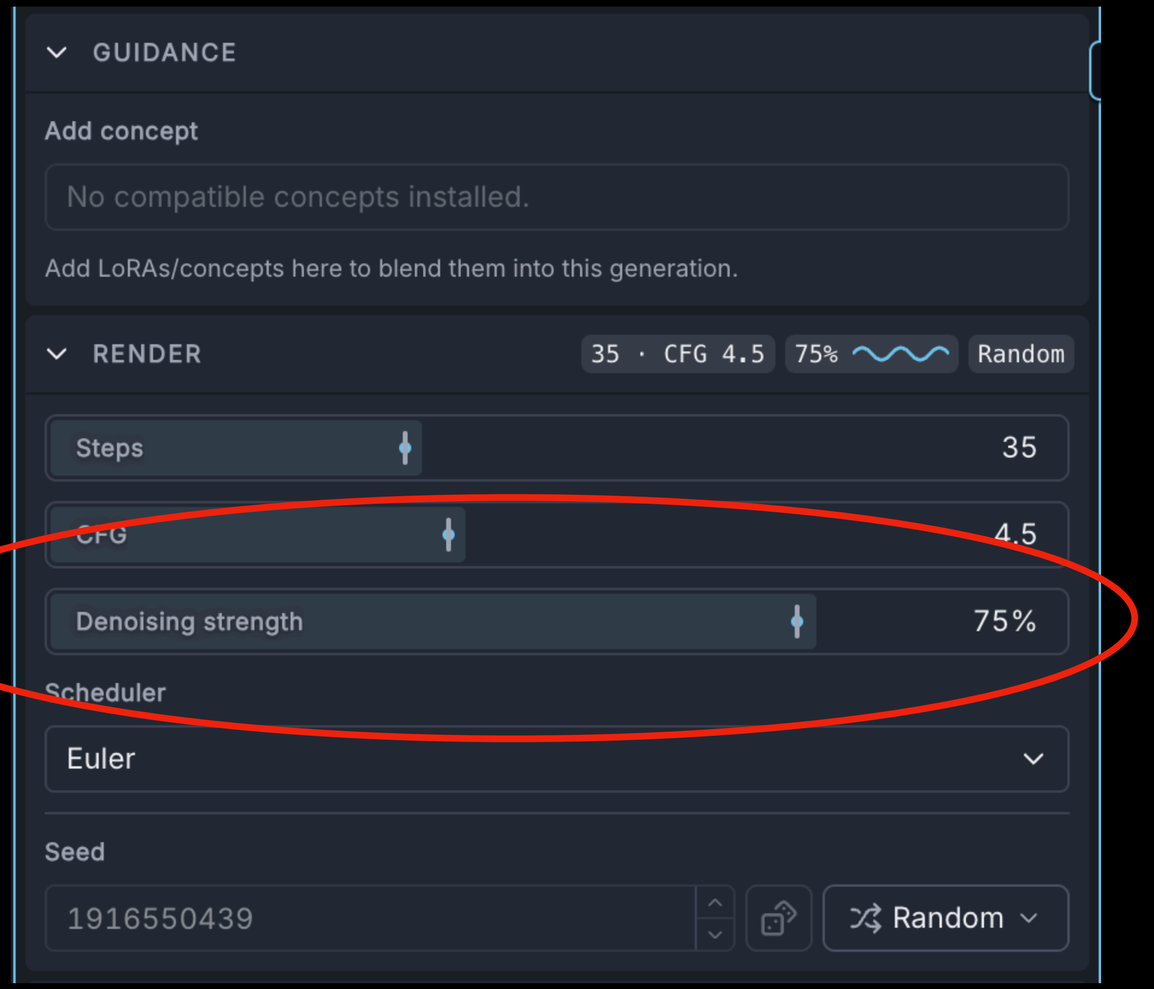

Glossary

- LoRA - A small model modifier
  - Only works with 1 base model
- Turbo model/LoRA - uses fewer steps
- CFG - How closely to follow the prompt
- Scheduler - how the model generates each step
- Seed - Same seed, same image

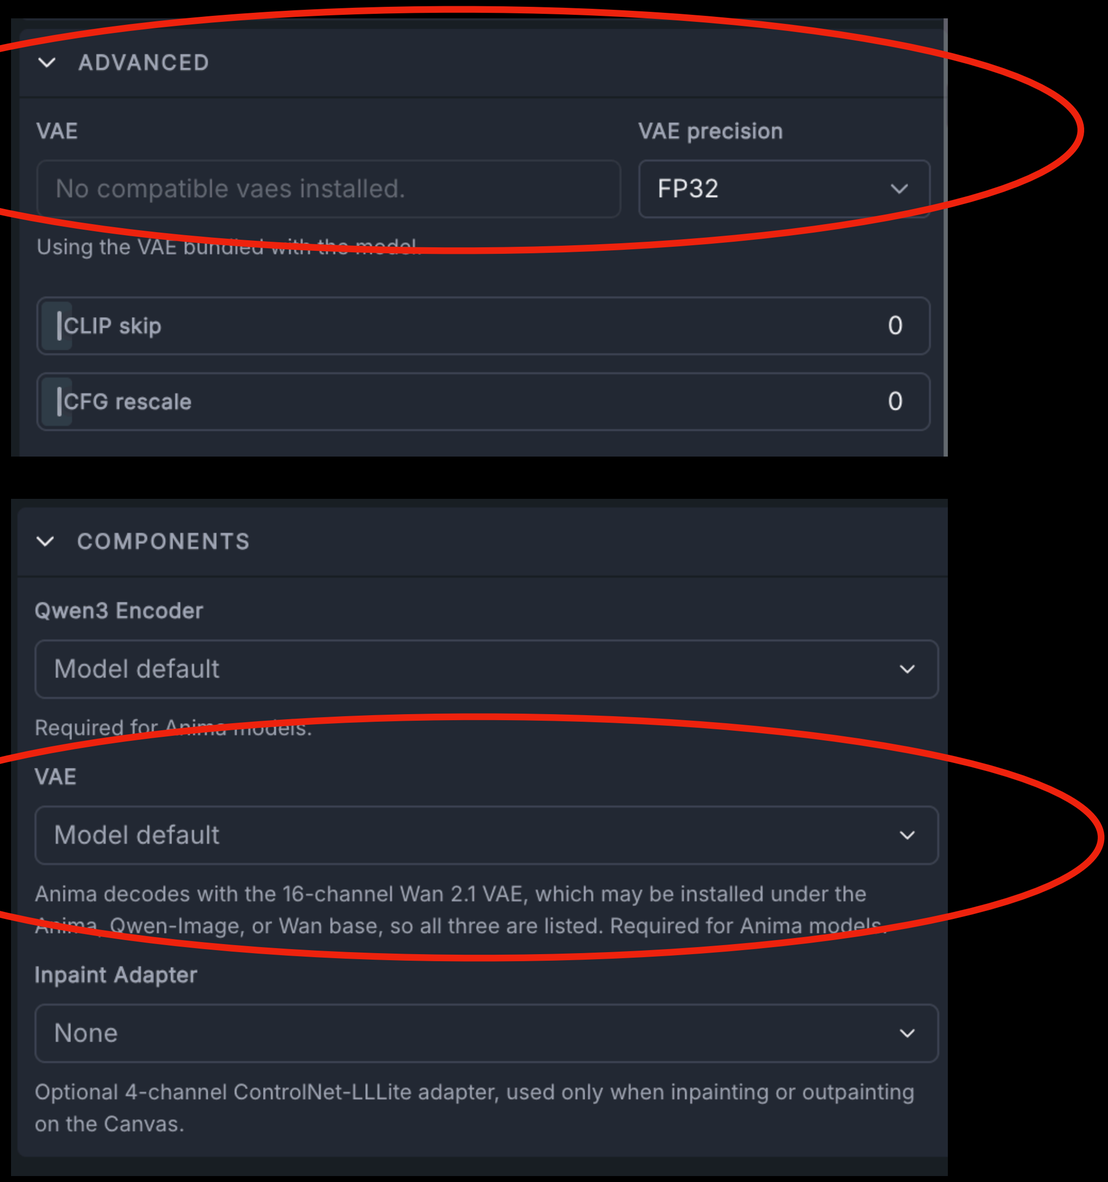

Glossary

- Denoising strength - how much to change the image (Image to image only)

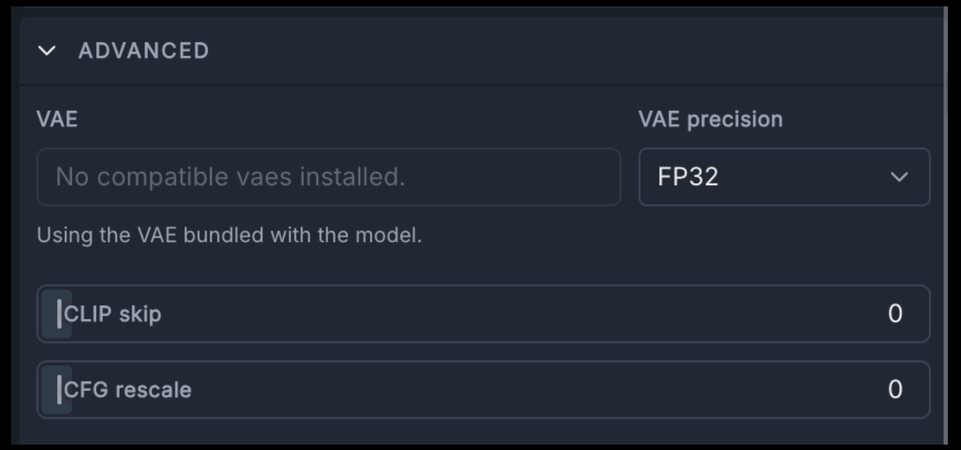

Glossary

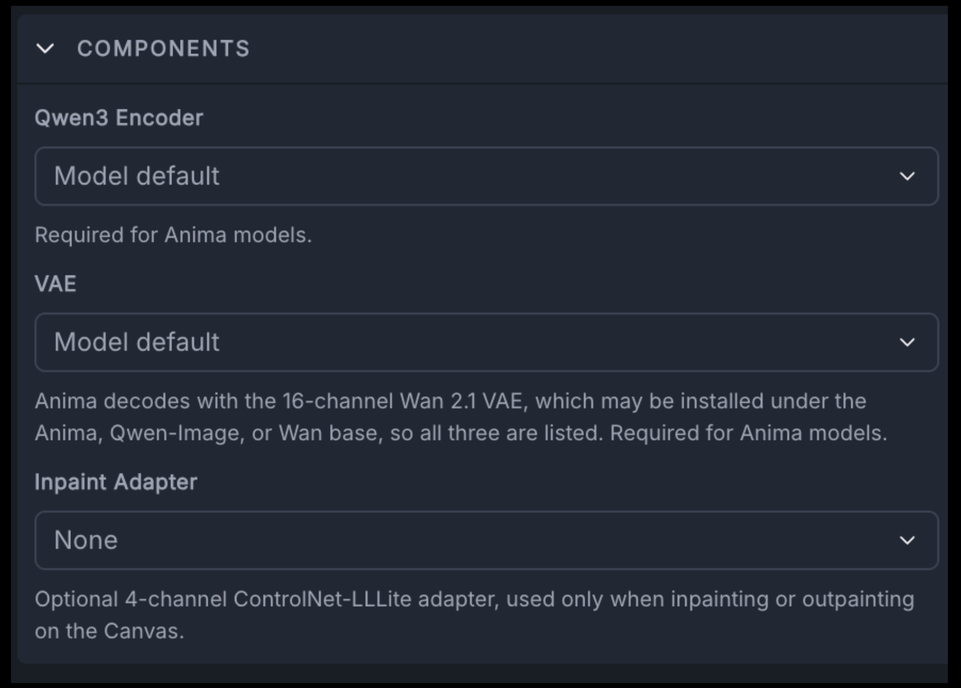

- VAE - Variational Autoencoder, converts between latent space and full image

Glossary

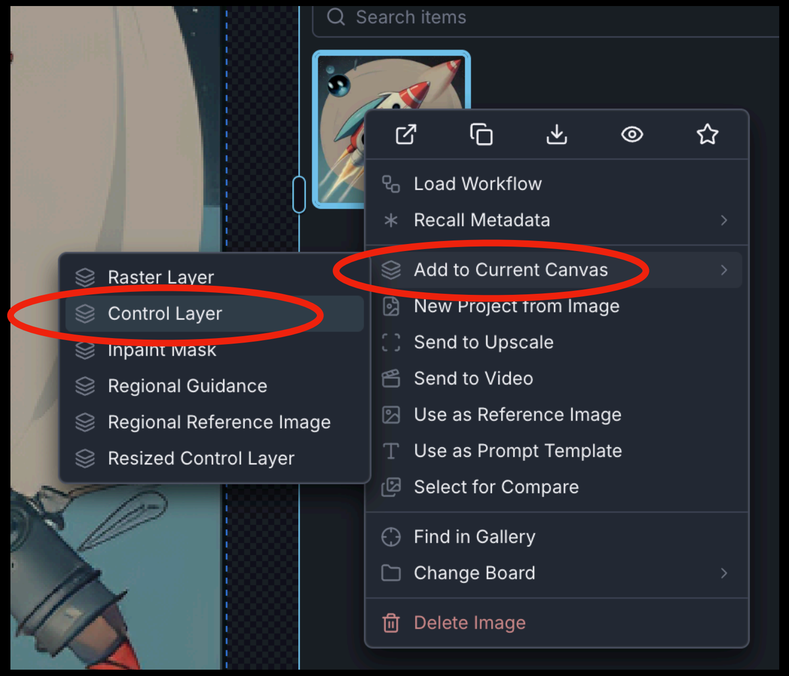

- VAE - Variational Autoencoder, converts between latent space and full image
- CLIP - Links text descriptions and visual ideas

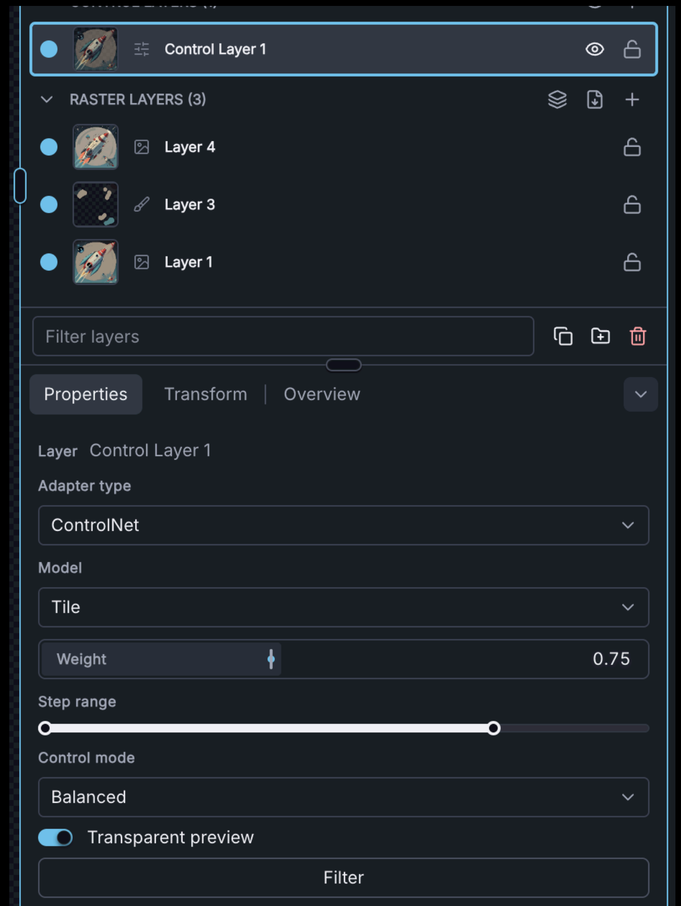

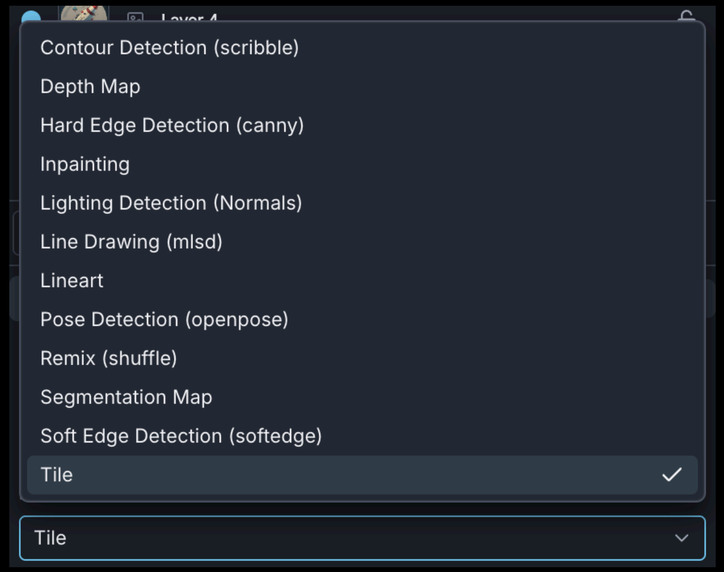

Glossary

- IP Adapter/ControlNet - Guides the image generation (not all models)

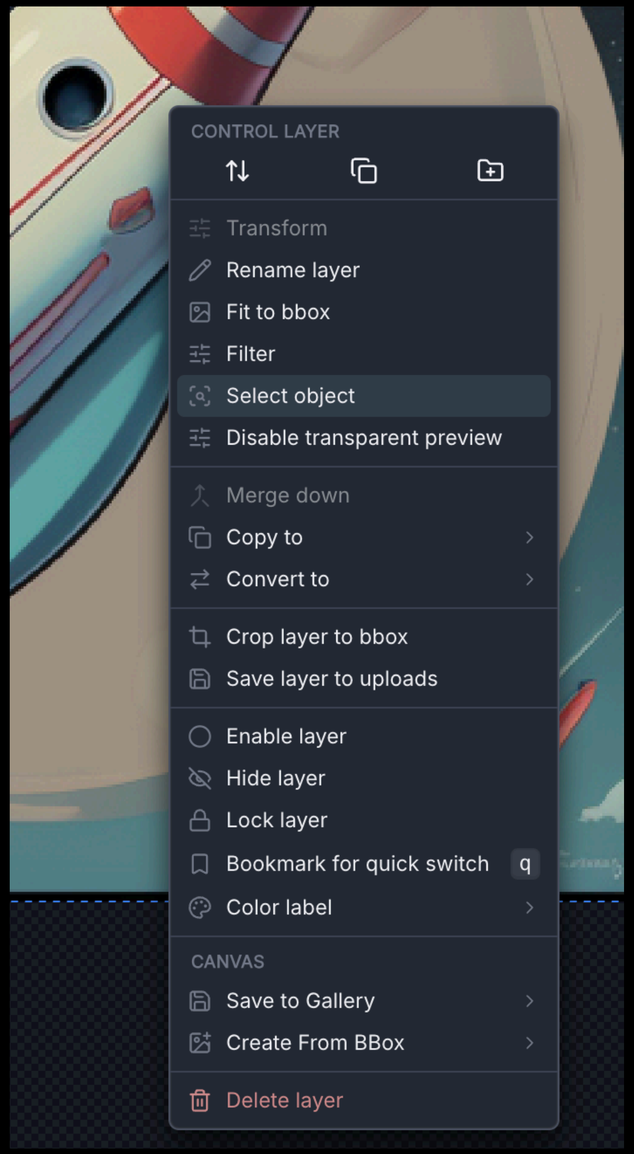

Glossary

- Canny result (this is editable)
- Depth, pose, and scribble can be created in different applications

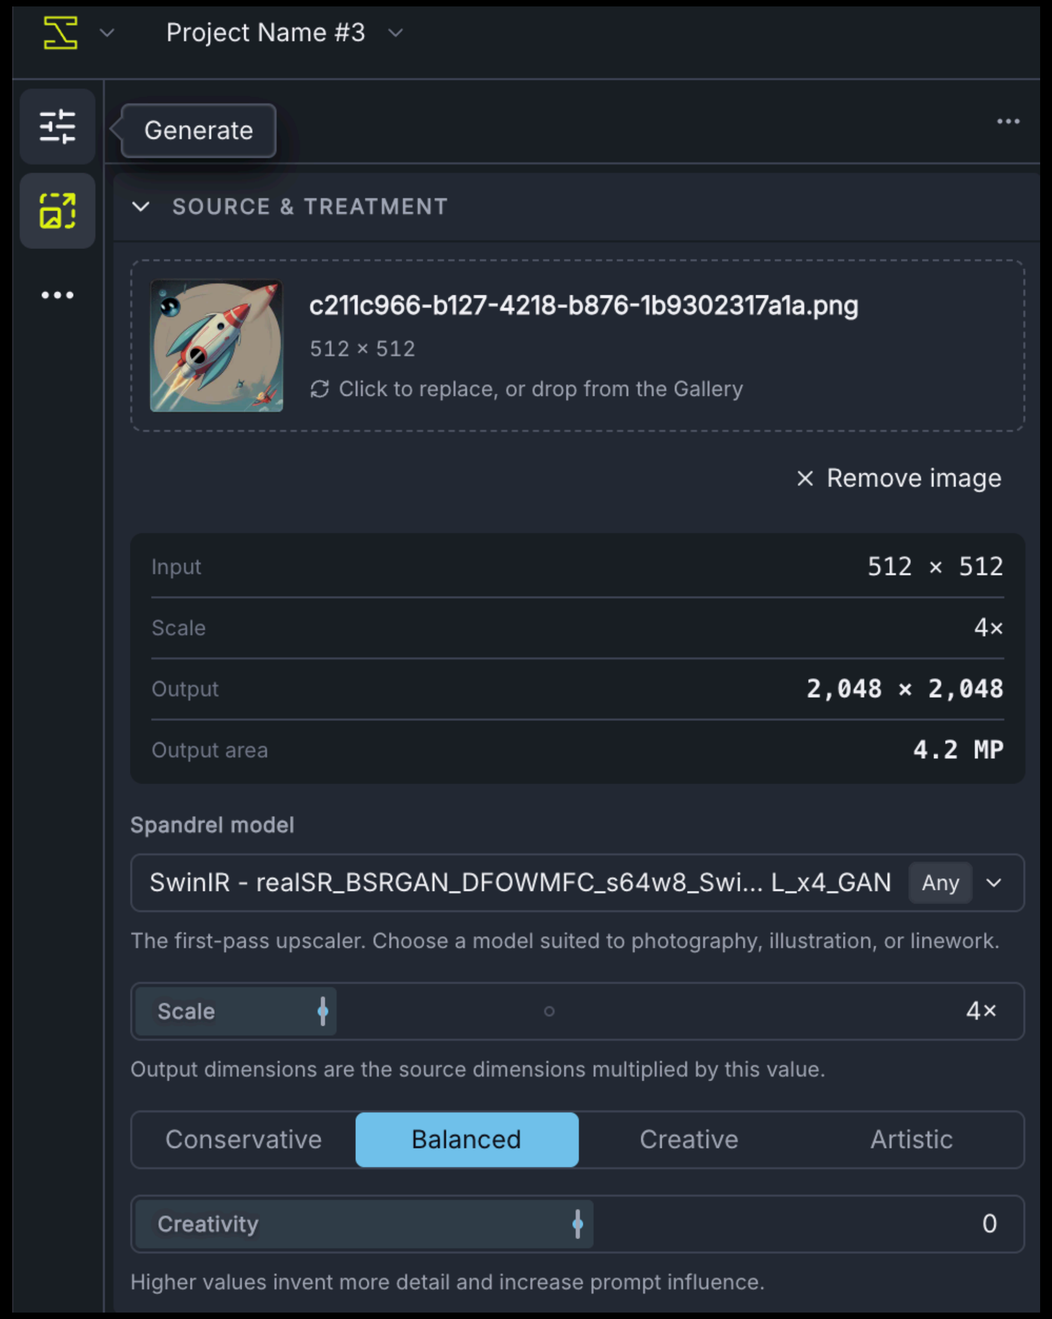

Glossary

- SAM (Segment Anything Model) Smart selection

Glossary

- GAN (Generative Adversarial Network)
  Used for upscaling

Model Families

Model Families

- SD1.5 - 2022, 512x512, 4 GB, there’s tons of models and LoRAs
- SDXL - 2023, 1024x1024, 6-8 GB
- FLUX.1 - 2024, 6–8 GB quantized; ~12 GB unquantized
- FLUX.2 - 2025, 8 GB for Klein 4B quantized, way more for the other versions
- Z-Image - 2025, 6–8 GB quantized, fast, turbo versions
- Qwen Image - 2025, ~12–16 GB, instruction following and text

Model Families

- ERNIE-Image - 2026, 24 GB,
- Anima - 2026, 6-8 GB, dedicated to anime, there’s a turbo LoRA
- Krea 2 - 2026, 8 GB for a quantized Krea 2 build
- Ideogram - 2023, typography, posters, and graphic design.
- Wan - Video, 2025, 8–12 GB for 1.3B; ~20+ GB for quantized 14B
- MiniMax H3 - Video, 2026, ?, can synchronize audio
- LTX 2.5 - Video, ?, it’s fast

Where to Get Models

CIVITAI

- CivitAI is a huge ImageGen community
- It is *the* hub for AI image models and LoRAs
- New content constantly being uploaded
- Used to host adult content but that has all moved to civitai.red

Demo
